Team work | Proactive | Punctual

Professional Experience

• WLC Technology

Software Developer – February 2023 to Present

As a Software Developer at WLC Technology, I have been actively contributing to the company's projects. My responsibilities include:

- **Code Development:** Writing clean, efficient, and maintainable code following industry best practices and coding standards.
- **Team Collaboration:** Working closely with developers and project managers, participating in code reviews, and providing constructive feedback to enhance code quality.
- **Problem-Solving:** Applying effective problem-solving skills to address technical challenges and ensure successful project outcomes. Analyzing and troubleshooting issues to identify root causes and implement appropriate solutions.
- **Technical Research:** Conducting research and evaluating new technologies to recommend improvements and optimize existing systems.

• Shaheed Mahendra Karma Vishwavidyalaya, Bastar

Technical Staff – 8 April 2021 to April 2022

- To facilitate the development and maintenance of the University website by regularly updating its content.
- Part of the Team who was working on the NAAC Accreditation Process.

- **Aisect Pradhan Mantri Kaushal Kendra Kanker**

Mobilizer – 16 August 2018 to 7 April 2021

- Engaged with individuals and communicated information about the project.
- Conducted small meetings to interact with people and explain the program's objectives and benefits.
- Played a role in setting up and maintaining the software, hardware, and network infrastructure of the institution.
- Ensured The smooth functioning of technology infrastructure to support project operations.

- **RR Telecom Raipur (Idea service point)**

Front Desk Executive – Feb. 2015 to Dec. 2015

- Interacted with customers to understand their requirements and provide appropriate solutions.
- Assisted customers in resolving technical issues with their Idea services.
- Handled customer queries and provided assistance to address their concerns.

- **Mphasis, Raipur (BPO)**

CSO – July 2013 to Jan. 2015

- Handled incoming calls from customers, addressing their queries and concerns.
- Provided appropriate solutions and guidance to customers through inbound calls.
- Documented customer interactions accurately for reference and follow-up purposes.

Projects

Throughout my professional journey, I have actively worked on many projects, Leveraging the MERN (MongoDB, Express, React, Node.js) stack, I have successfully developed various web applications. These projects encompassed both frontend and backend development.

Additionally, I have integrated various third-party services into my projects, including Github OAuth login flow, OneDrive integration, and Google Calendar integration.

These integrations demonstrate my ability to incorporate external APIs and harness their functionalities to enhance application capabilities.

By leveraging technologies like React, Next.js, TypeScript, and Express, I have built APIs and RESTful services to enable smooth communication between frontend and backend components.

Some of the projects I have worked on :

- **Trackify** – Project at WLC technology

A project management system with features for project creation, tracking, client assignment, work timer, collaboration, and holiday scheduling to enhance project delivery efficiency and facilitate accurate scheduling.

Tech Stacks

React | ExpressJS | Material UI | MongoDB | Redux Toolkit

Responsibilities

- Developing frontend UI components, designing and implementing APIs, and collaborating with the team to achieve the objectives of the project.

- **Takeitnow** – Group Project

Build in 5 Days

Developed a demo e-commerce site that enables users to sign up, log in, browse and purchase the latest collections for men, women, and kids. Implemented features for updating user profiles, managing shopping carts, and included an admin section for efficient product and user management.

Tech Stacks

Next.js | React | Chakra UI | Redux Toolkit | MongoDB | TypeScript

Responsibilities

- Managing database using MongoDB, writing APIs in Next.js, creation of complete admin section and landing page of the project
